

Safety Recall FLC (F2C) - **Preliminary Notice**  
Certain 2015 Model Year NX 200t Vehicles  
Brake Actuator - FAQ

**Q1: What is the condition?**

A1: The subject vehicles are equipped with an Anti-Lock Braking System (ABS), Traction Control System (TRAC), and Vehicle Stability Control System (VSC) which are controlled by the ABS actuator. There is a possibility that a component inside the actuator could be damaged during assembly and later not operate properly. Under some driving conditions, when the Anti-Lock Brakes are activated, this could cause a loss of vehicle stability, which can increase the risk of a crash.

**Q1a: What is the cause of the condition?**

A1a: Due to the improper shape of a component inside the ABS actuator, there is a possibility that a resin component could be damaged during its press fitting assembly, creating minute resin fragment(s) which could become stuck in the actuator.

**Q1b: What is ABS?**

A1b: The Anti-Lock Braking System (ABS) manages the brake force at each wheel during braking to help prevent or minimize wheel lock up, maximizing stopping performance under a variety of driving and road surface conditions.

**Q1c: What is TRAC?**

A1c: The Traction Control System (TRAC) helps minimize the slippage of the drive wheels if the driver depresses the accelerator pedal excessively when accelerating on a low traction road surface.

**Q1d: What is VSC?**

A1d: The Vehicle Stability Control System (VSC) assists the driver in maintaining directional control of the vehicle by applying individual brake pressure to the appropriate wheels and managing engine output.

**Q2: What is Lexus going to do?**

A2: **Lexus is currently preparing the remedy for this condition.** Once preparations are complete, Lexus will send an owner notification letter by first class mail to owners of vehicles involved in this Safety Recall.

The remedy, when available, will include an inspection of the ABS actuator. If affected, the ABS actuator will be replaced at **No Charge** to you.

**Q2a: When does Lexus anticipate the remedy will be available?**

A2a: Lexus is currently preparing the remedy for this Safety Recall and will provide additional information as it becomes available.

**Q3: Are there any warnings or indicators of this condition?**

A3: No. There are no advanced warnings prior to the existence of this condition.

**Q3a: What if I experience this condition before the remedy is available?**

A3a: If you experience this condition, please contact your local authorized Lexus dealer for diagnosis. If the condition is related to this Safety Recall, the repair will be performed at **No Charge** to you.

**Q3b: Can my vehicle be driven if this condition occurs on my vehicle?**

A3b: Yes, the vehicle can still be driven, as the *standard braking system remains operational* even if you experience the described condition. However, as the enhanced functions (ABS, TRAC, and VSC) may not operate properly, Lexus requests that you use caution while driving, especially under adverse weather conditions.

**Q4: How does Lexus obtain my mailing information?**

A4: Lexus uses an industry provider who works with each state's Department of Motor Vehicles (DMV) to receive registration or title information, based upon the DMV records. Please make sure your registration or title information is correct.

**Q5: Which and how many vehicles are involved in this Safety Recall?**

A5: There are approximately 3,000 vehicles covered by this Safety Recall in the U.S.

Model	Model Year	Production Period	Approx. UIO
NX 200t	Certain 2015	Mid-December 2014 through Early February 2015	3,000

**Q5a: Are there any other Toyota, Lexus or Scion vehicles involved in this Safety Recall in the U.S.?**

A5a: No. There are no other Toyota, Lexus, or Scion vehicles involved.

**Q6: What if I have additional questions or concerns?**

A6: If you have additional questions or concerns, please contact the Lexus Customer Assistance Center at 1-800-255-3987 Monday through Friday, 5:00 am to 6:00 pm, or Saturday 7:00 am to 4:00 pm Pacific Time.
