

# Lexus Technical Training Product Matrix

ITEM NUMBER	MODEL YEAR or DATE RELEASED	PRODUCT	PRODUCT DESCRIPTION	CURRICULUM CATEGORY	DESCRIPTION
<b>TECHNICIAN HANDBOOKS</b>					
00246-L453X-TH	7/15/2005	Lexus	L453 Suspension, Steering, and Handling	Chassis	Fundamental principles and operation of tires and wheels, suspension components, steering gear, linkage, and power assist systems. Inspection and diagnostic methods are reviewed for each major component area. The course incorporates a thorough review of wheel alignment geometry and wheel alignment correction and provides a diagnostic method for vehicle handling concerns.
00246-L472X-TH	1/17/2002	Lexus	L472 Noise, Vibration, Harshness Diagnosis	Chassis	This course is designed to provide the necessary background and hands-on experience to successfully resolve serviceable noise, vibration and harshness (NVH) concerns the first time. The <i>Technician Handbook</i> has been designed for use both during the course and as a reference in the shop.
00246-L852X-TH	10/4/2004	Lexus	L852 Engine Control Systems I V2	Engine	This course is designed to increase the Technician's understanding and diagnostic skills related to Lexus engine control systems. Major areas to be covered are the identification, operation, function, and basic diagnosis of the following: Electronic Control Module (ECM); fuel injection system; ECS sensors and actuators; and ignition systems.
00246-L874X-TH	3/29/2002	Lexus	L874 Engine Control Systems II	Engine	This course is designed to provide the Technician with skills necessary to practice an advanced diagnostic process. Use of the diagnostic testers and vehicle functions to acquire, analyze, and interpret various types of data will be covered. The course will focus on data gathered from the engine control system to identify and service system malfunctions.
